

cFluor® UV395 Streptavidin

PRODUCT DETAILS	
Catalog Number:	R7-90014 (100 Tests)
Specificity:	Biotin
Format:	cFluor® UV395
Volume Per Test:	5 µl/Test
Application:	Flow Cytometry
Formulation:	Phosphate-buffered saline, pH 7.2, containing 0.1% PEG 3350, 0.1% Pluronic F-68, 0.05% Tween-20, 0.09% sodium azide and 1% BSA (BSA Country of Origin USA)
Storage:	2-8°C protected from light. Do not freeze

PRODUCT DESCRIPTION

Streptavidin is a second-step reagent useful when detecting biotinylated antibodies in indirect staining protocols. Streptavidin is a nonglycosylated biotin-binding protein that is bacterially derived. Like avidin, it binds to biotin with high affinity but displays less nonspecific binding.

RECOMMENDED USAGE

Each lot of this reagent is quality control tested using flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5 µL per 1 million cells in a staining volume of 100 µL.

Please briefly centrifuge the reagent vial before use.

Use appropriate personal protective equipment per the product safety data sheet when using this product.

PRODUCT DATA

Left: cFluor® V780 conjugated Mouse anti-Human CD3. Right: cFluor® V780 conjugated Mouse anti-Human CD3 and Biotin conjugated Mouse anti-Human CD8 detected with Streptavidin cFluor® UV395. All experiments performed on red cell lysed human blood gated on live lymphocytes, in the presence of 10% human serum. Data acquired on the ZE5 Cell Analyzer. A B

Spectral signature of cFluor® UV395 from a Cytek Aurora™ 5-laser system equipped with 355, 405, 488, 561, and 640 nm lasers using CytekAssaySetting.
